EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Ko-Fang Chang on 14 April 2005.

The application has been amended as follows:

In the Specification:

The Specification has been amended as follows:

Page 2, line 17, "10/001,895" has been added after "Application No."

Page 2, line 20, "10/001,894" has been added after "Application No."

Page 2, line 24, "10/001,891" has been added after "Application No."

Page 2, line 28, "10/001,893" has been added after "Application No."

In the claims:

Claim 1 (line 9) has been amended as follows:

relevant to the first concept of interest is annotated when printed on the one [[the]]
or more pages.

Claim 18 (lines 13-14) has been amended as follows:

the first concept of interest is annotated when printed on the one or more pages, ~~the one or more pages comprising one or more pages.~~

Claim 29 (lines 10-11) has been amended as follows:

to be relevant to the first concept of interest is annotated when printed on the one or more pages, ~~the one or more pages comprising one or more pages.~~

Reasons for Allowance

2. Claims 1-11 and 18-33 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 18, and 29 have been carefully considered. Prior art of record fails to teach the combination of claimed elements including a method of generating a paper document for a multimedia document having multimedia information including video information; entering a concept of interest by the user; analyzing the multimedia information to identify information relevant to the user's concept of interest; and then printing the multimedia information on a paper medium, wherein the identified relevant information of the user's concept of interest is annotated when printed on the paper medium.

Schelling et al (US 5,706,097) discloses a method for identifying images and sound recordings and creating an index print having a plurality of index images

representing still images, motion sequences and sound sequences on a digital recording medium. Schelling teaches that the index print may be used for printing an image of the document but fails to teach or suggest analyzing the multimedia information to identify information relevant to the user's concept of interest; and then printing the multimedia information on a paper medium to generate the paper document, wherein the identified relevant information of the user's concept of interest is annotated when printed on the paper medium.

Nielsen et al (US 6,055,542) discloses a method for allowing a user to create an interest profile for finding information of interest within a document. A profile is created that may be used on any document or web page to sort the information on the page according to the user's interests and then the results are displayed. Nielsen fails to teach or suggest analyzing multimedia information to identify information relevant to the user's concept of interest; and then printing the multimedia information on a paper medium to generate the paper document, wherein the identified relevant information of the user's concept of interest is annotated when printed on the paper medium.

Gibbon et al (US 6,098,082) discloses pictorial transcript representation of a video program in a format suitable for electronic searching and retrieval. Gibbon teaches that pictorial transcripts are compact representations of video programs

having representative frames printed with a caption containing the portion of the closed-caption text that corresponds to the scene from which the representative frame is taken. Gibbon fails to teach or suggest analyzing multimedia information to identify information relevant to the user's concept of interest; and then printing the multimedia information on a paper medium to generate the paper document, wherein the identified relevant information of the user's concept of interest is annotated when printed on the paper medium.

Conclusion

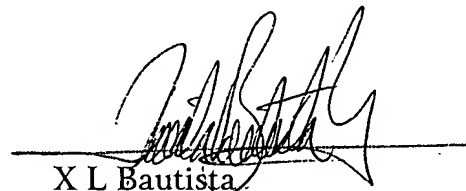

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
